Current

Our ideals, our service, your advantage!

Quality. Made in Germany

All Sommer-automatic products are produced by us in Rheinau, Germany.

We **test** them before delivery for quality, load capacity, and precision.

Over **5 million** modules sold, some with over **30 million** strokes per module are proof of this.

By the way, most of our grippers' housings are made from hard-anodized Aluminum (that means: minimal weight, slides easily, no corrosion, hardness over 600 HV, scratch and wearproof surface).

All of our materials are made to our own exacting specifications. This gives us higher quality, a more consistent and therefore a more reliable product. As a rule, the functional parts are made

from nitrided steel (that means: wearproof with high surface hardness and flexibility against breaking with a soft core).

Innovative developments

We think of the future in order to always be one step ahead. Our products must work precisely, reliably, resiliently, flexibly and be user-friendly in order to fulfill your **demands for economic performance**.

We work for that every day.

Customer-oriented design team

Whether it is concerning further development of individual modules, or whether you are looking for a systems supplier to solve your **automation needs**, our design team thinks and acts to your benefit.

The match trick

We offer products in all sizes.

A match placed next to every product photograph helps you to correctly judge the size of the products at a quick glance.

Environmental orientation

We think and act ecologically and avoid harmful materials and processes.

Sommer-automatic, available everywhere

by telephone at all international **Trade Fairs** or through our foreign representatives (see back side of catalog).

Technical support

How does that work? Does it fit? ... we gladly take the time to answer your technical questions. By telephone, or for larger applications at your location.

Quick and simple: You order and we deliver

We are there for you. By telephone: Monday through Friday, 8:30 am until 5:00 pm (EST). Or around the clock by fax or e-mail. Orders received for in-stock items, before 12:00 pm (EST), are shipped out that same day, in most cases.

Test it without risk!

Try us out! You can try out any product for **10 days** at no charge (less shipping of course!) and no obligation. All we require is a valid purchase order and that the product be returned in new condition in its original packing.

CAD drawings available

In many formats:
2 dimensional in DXF, DWG, IGES etc., or
3 dimensional in IGES, ProE, Catia, Step etc.
On CD. Or via Internet:
www.techno-sommer.com
With smart quick-find program.
