Hand-held vacuum

- ▶ integrated vacuum generator
- ▶ vacuum (bar) -0,6

Order no.:
HS10
Air consumption per minute [l norm.]:
13

All data measured at 6 bar.

• for very small parts

Imagine being able to handle miniature parts without using your fingers. This is now possible with the Hand-held vacuum. At the tip of this device is a mount for a vacuum cup. Vacuum can be applied or removed by opening or closing and airhole with one's finger. The vacuum is generated by compressed air flowing through a built-in venturi type vacuum generator in the handle which can begin producing a vacuum at as low as 2 bar.

Vacuum cups for hand-held vacuum

Order no.:					
SM1	SM2	SM3	SM4	SM5	SM6
Vacuum force [N]:					
0,05	0,19	0,42	0,75	1,18	1,70
Dimension ø [mm]:					
1	2	3	4	5	6

All data measured at 0.6 bar vacuum.

Don't forget!
Order vacuum cup and adapter separately.
