## Rubber jaw liners

Order no.:	
GU1	GU2
Firmness DIN53 504 min. [N/mm2]:	
10	10

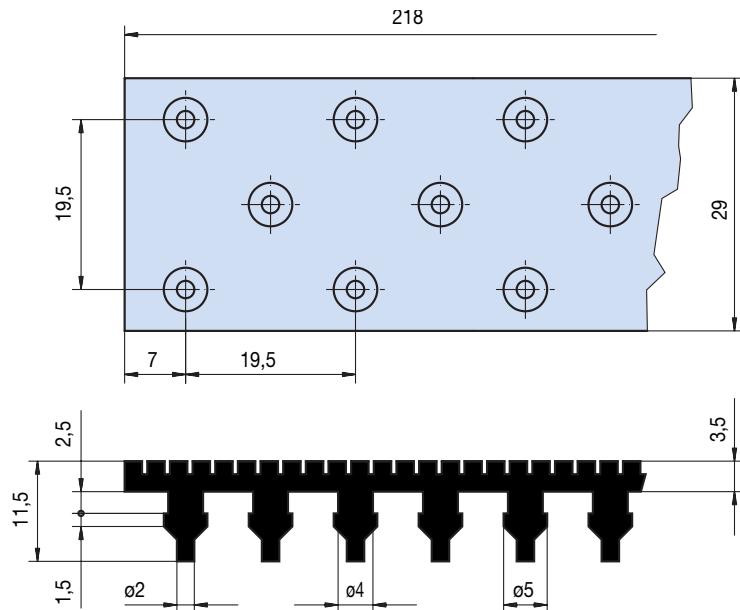

• **With retaining buttons or aluminum plate**  
 When installed on gripper jaws, Rubber Jaw Liners prevent slippage and ensure that workpieces are gripped safely and securely. The rubber liners can compensate for a wide range of tolerance on parts. Liners with retaining buttons can also be replaced quickly and easily. (Standard 65 +3 Durometer).

Aluminum backed liners (GU2) can be screwed securely in place.
